

CD192 Polyclonal Antibody

Description

Product type Primary Antibody

Code BT-AP01390

Host Rabbit

Isotype IgG

Size 20ul, 50ul, 100ul

Immunogen The antiserum was produced against synthesized peptide derived from the N-terminal region of human

CCR2. AA range:1-50

Mol wt 41915

Species reactivity Human

Clonality Polyclonal

Recommended application WB, ELISA

Concentration 1 mg/ml

Full name CD192 Antibody

Synonyms CCR2; CMKBR2; C-C chemokine receptor type 2; C-C CKR-2; CC-CKR-2; CCR2; Monocyte

chemoattractant protein 1 receptor; MCP-1-R; CD192

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

CCR2 encodes two isoforms of a receptor for monocyte chemoattractant protein-1, a chemokine which specifically mediates monocyte chemoataxis. Monocyte chemoattractant protein-1 is involved in monocyte infiltration in inflammatory diseases such as rheumatoid arthritis as well as in the inflammatory response against tumors. The receptors encoded by this gene mediate agonist-dependent calcium mobilization and inhibition of adenylyl cyclase. CCR2 is located in the chemokine receptor gene cluster region. Two alternatively spliced transcript variants are expressed by the gene.

Recommended Dilution

WB: 1: 500 - 1: 2000 ELISA: 1: 10000

Not yet tested in other applications.
