

CtIP Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP02300
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	The antiserum was produced against synthesized peptide derived from human RBBP8. AA range:630-679
Mol wt	101942
Species reactivity	Human, Mouse
Clonality	Polyclonal
Recommended application	IHC-p, ELISA
Concentration	1 mg/ml
Full name	CtIP Antibody
Synonyms	RBBP8; CTIP; DNA endonuclease RBBP8; CtBP-interacting protein; CtIP; Retinoblastoma-binding protein 8; RBBP-8; Retinoblastoma-interacting protein and myosin-like; RIM; Sporulation in the absence of SP

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

The protein encoded by RBBP8 (RB binding protein 8, endonuclease) is a ubiquitously expressed nuclear protein. It is found among several proteins that bind directly to retinoblastoma protein, which regulates cell proliferation. This protein complexes with transcriptional co-repressor CTBP. It is also associated with BRCA1 and is thought to modulate the functions of BRCA1 in transcriptional regulation, DNA repair, and/or cell cycle checkpoint control. It is suggested that RBBP8 may itself be a tumor suppressor acting in the same pathway as BRCA1. Three transcript variants encoding two different isoforms have been found for RBBP8. More transcript variants exist, but their full-length natures have not been determined.

Recommended Dilution

IHC: 1: 100 - 1: 300

ELISA: 1: 5000

Not yet tested in other applications.

Images

Immunohistochemistry analysis of paraffin-embedded human thyroid gland tissue, using RBBP8 Antibody. The picture on the right is blocked with the synthesized peptide.

Storage

-20°C for one year
