

IRF-3(Phospho Ser396) Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP10488
Host	Rabbit
Isotype	IgG
Size	20ul, 50ul, 100ul
Immunogen	The antiserum was produced against synthesized peptide derived from human IRF-3 around the phosphorylation site of Ser396. AA range:362-411
Mol wt	47219
Species reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Recommended application	WB, ELISA
Concentration	1 mg/ml
Full name	Interferon regulatory factor 3
Synonyms	Interferon regulatory factor 3; IRF3; Interferon regulatory factor 3; IRF-3

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

This gene encodes a member of the interferon regulatory transcription factor (IRF) family. The encoded protein is found in an inactive cytoplasmic form that upon serine/threonine phosphorylation forms a complex with CREBBP. This complex translocates to the nucleus and activates the transcription of interferons alpha and beta, as well as other interferon-induced genes. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.

Recommended Dilution

WB: 1: 500 - 1: 2000

ELISA: 1: 20000

Not yet tested in other applications.

Images

Western blot analysis of lysates from Jurkat cells treated with EGF 200ng/ml 30', using IRF-3 (Phospho-Ser396) Antibody. The lane on the right is blocked with the phospho peptide.

Storage

-20°C for 1 year
