

RL38 Rabbit Polyclonal Antibody

Description

Product type	Primary Antibody
Code	BT-AP12299
Host	Rabbit
Isotype	IgG
Size	100ul, 50ul, 20ul
Immunogen	Synthesized peptide derived from human RL38
Mol wt	7700
Species reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Recommended application	IHC-p, IF
Concentration	1 mg/ml
Full name	RL38
Synonyms	RL38

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

Ribosomes| the organelles that catalyze protein synthesis| consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L38E family of ribosomal proteins. It is located in the cytoplasm. Alternative splice variants have been identified| both encoding the same protein. As is typical for genes encoding ribosomal proteins| there are multiple processed pseudogenes of this gene dispersed through the genome| including one located in the promoter region of the type 1 angiotensin II receptor gene.

Recommended Dilution

IHC-p: 1: 50 - 1: 200

Not yet tested in other applications.
