

Phospho-4E-BP1 (T37) Polyclonal Antibody

BT-PHS00001

Description

Code

Product type Primary Antibody

Host Rabbit

Isotype IgG

Size 20ul, 50ul, 100ul

Immunogen The antiserum was produced against synthesized peptide derived from human 4E-BP1 around the

phosphorylation site of Thr36. AA range:4-53

Mol wt 12449

Species reactivity Human, mouse, rat

Clonality Polyclonal

Recommended application WB, IHC-p, ELISA

Concentration 1 mg/ml

Full name Phospho-4E-BP1 (T37) Antibody

Synonyms EIF4EBP1; Eukaryotic translation initiation factor 4E-binding protein 1; 4E-BP1; eIF4E-binding protein 1;

Phosphorylated heat- and acid-stable protein regulated by insulin 1; PHAS-I

This product is for research use only, not for use in human, therapeutic or diagnostic procedure.

Background

EIF4EBP1 encodes one member of a family of translation repressor proteins. The protein directly interacts with eukaryotic translation initiation factor 4E (eIF4E), which is a limiting component of the multisubunit complex that recruits 40S ribosomal subunits to the 5' end of mRNAs. Interaction of this protein with eIF4E inhibits complex assembly and represses translation. This protein is phosphorylated in response to various signals including UV irradiation and insulin signaling, resulting in its dissociation from eIF4E and activation of mRNA translation.

Recommended Dilution

WB: 1: 500 - 1: 2000 IHC: 1: 100 - 1: 300 ELISA: 1: 10000

Not yet tested in other applications.
